

Ladies and Gentlemen,

We are pleased to invite you to the next edition of the International Conference “**Science and Industry – Challenges and Opportunities**”, which will be held from **June 23–25, 2026**, in Lublin (Institute of Biological Sciences, Faculty of Medicine JP II KUL, Konstatntynow 11 St.) and in Puławy (Puławski Park Naukowo-Technologiczny – Mościckiego 1 St.).

Last year's edition demonstrated that the combination of scientific knowledge and industrial experience paves the way for the development of modern, competitive technologies. The upcoming event will provide a unique opportunity to look to the future—to explore the emerging directions of contemporary science and industry. Our aim is to discover new areas of cooperation, draw inspiration from the achievements of others, and create a space for dialogue between researchers, innovators, and representatives of companies.

The conference is organized by the Institute of Biological Sciences of the John Paul II Catholic University of Lublin (KUL), the Institute of Chemical Sciences of Maria Curie-Skłodowska University in Lublin (UMCS), the Polish Chemical Society (PTChem), and the Łukasiewicz Research Network – New Chemical Syntheses Institute (Łukasiewicz – INS).

On behalf of Łukasiewicz INS, we also invite you to participate in the Summer School of Catalysis, which will take place on June 24 in Puławy. You can find more information on the Łukasiewicz INS website: <https://ins.lukasiewicz.gov.pl/index.php/en/>

We cordially invite you to participate!

On behalf of the Organizing Committee

Dr hab. n. med. Maciej Mastyk, Prof. KUL
